4

5

6

7

For ruler 1, <9> (Chuwen) can arise by error more easily from <7> than from <12>.

For ruler 2, <7> (Imix) can arise by error more easily from <12> than from <10>.

For ruler 5, <7-te> (Zotz') can arise by error more easily from <8-te> than from <4-te>.

Several name glyphs have consistently different styles in the second group (DCE)

Owners of the pots (found in the PSS) may all be different (suggestion from Helen Alexander)
